LOCATION:
Lisburn

SERVICE/EQUIPMENT:

- 2 x 600kW Container Boilers
- 2 x 1,000ltr Expansion Vessels
- Associated flexible pipe work and fittings
- Fuel Tanks

Duration:
18 Weeks

THE BRIEF

The consultant and M&E contractor at a large government building required a heating and hot water solution for a new District Heating System.

THE BACKGROUND

After undertaking a detailed project survey, the Cross Hire team soon realised an "Off-The-Shelf" packaged boiler solution would not be suitable. A bespoke solution, therefore, was required.

THE SOLUTION

Two 600kW container boilers were delivered and installed to deliver one single 1200kW output. The flow and return were connected straight onto the existing circuit, which helped to ensure there was minimum disruption to the ongoing project.

Integral to this installation were the two 1,000ltr expansion vessels. Cross Hire commissioned and set up a maintenance programme to ensure no loss of heat or hot water during the installation – crucial given that occupancy is 24/7 year-round.

Cross Hire completed the project with minimum disruption to this high-security facility.

About Cross Hire

Cross Hire provides temporary heating and **much, much more** for events and other industry applications.
